BEST AVAILABLE COPY**AMENDMENTS TO THE CLAIMS:**

1. (Currently Amended) A cooling fan comprising: ~~comprised of a fan body mounted on a base through a shaft assembly, in said base, a depression having at least an upward and a sideward opening being formed centrally in the primary portion, and said fan body being extended from its circumferential surface outwardly to form a plurality of fan leaves, an electrical device for driving the fan body being arranged in said base, in which all the bottom edges of said fan leaves are fixedly jointed with a common baseplate, which is also formed by extending the circumferential surface of said fan body, without any clearance~~
a base having a depression formed centrally in said base, said depression having at least an upward opening and a sideward opening;
a fan body pivotally mounted on said base in said depression through a shaft assembly;
a plurality of fan leaves extended outwardly from a circumferential surface of said shaft assembly; and
a baseplate extended from said shaft assembly below said plurality of fan leaves and jointed with bottom edges of said plurality of fan leaves;
wherein said baseplate has a circumferential edge extended from said shaft assembly more outwardly than outermost edges of said plurality of fan leaves.
2. (Original) The cooling fan according to claim 1, in which each fan leaf is twisted by a specific angle to form a curved face.
3. (Original) The cooling fan according to claim 1, in which each fan leaf forms a plane
